

## Static Website

Designing static website is the simplest way to showcase your product or business online. Static web sites are designed for easy downloadable images, browser compatibility and easy navigation having effective graphics and interactivity. It contains a site with linked pages using a font or graphics-based logo, and containing text, and simple graphics. Sites may include any number of pages with minimum script and HTML.

Static Plan	Name	Domain	Pages	Hosting	Design
5000	Corporate	1	Unlimeted	100mb	Design as per clients requirement fully corporate
8000	Corporate	1	Unlimeted	100mb	Design as per clients requirement fully corporate + Flash intro

## Dynamic Website

A dynamic website is required for content such as online databases, e-business, collaborative content, membership, private areas, knowledge base, a resume or jobs database, online shopping site etc. A dynamic web page is any web page which has content that is changed by a program or script at the time the page is requested. Dynamic website pages are pages that allow a user to set preferences regarding what kind of information will be displayed.
